

Utah Asthma Task Force

Draft

VISION STATEMENT

Utah communities work together to assure a high level quality of life for people with asthma.

WORKGROUP MISSION STATEMENTS

Education

Ensure that all asthma education and messages delivered to the public, patients and health care providers are unified, accurate, consistent, and appropriate.

Health Systems

Assure high quality care to people with asthma in the state of Utah from an affordable, responsible, accountable and integrated health care system.

Patient Issues

Provide the tools and resources necessary to maximize and promote wellness and improved quality of life for people with chronic asthma symptoms.

Risk Factor

Describe environmental and familial Utah specific risk factors for asthma and increase awareness of risk factor issues.

Surveillance and Monitoring

Assure availability of high quality data to guide interventions that prevent asthma and improve the quality of life for people with asthma.
